

Project L.I.F.T. - Shape the Future

A PC, Broadband, Software & Training for West Charlotte Corridor Families

One of the key areas of focus for Project L.I.F.T. surrounds technology. We believe that having access to a computer and the internet at home can help close the achievement gap and provide access for families to workforce training and skills.

Project L.I.F.T. will assist in providing a high-quality computer from M&A Technology to Project L.I.F.T. families with:

- ✓ Microsoft Windows 7 OS
- ✓ Microsoft Office 2010 Professional
- ✓ Free safe Kajeet Mobile Broadband and WiFi
- ✓ Free educational tools
- ✓ Free training on how to best use the PC to support your student's education and develop employable skills for adults

The total package value (computer, software and Internet access) is approximately \$1,250. The package is available to eligible Project L.I.F.T. families for \$150. Families will be responsible for broadband in year two. Please submit an order form with \$150 on by November 20th.

Quantities are limited and will be distributed on a first come basis. Families will be contacted with details on delivery and training within two weeks after the November 20th due date.

For more information on this program, email Andrea Gillus-Jackson at LIFTlaptop@gmail.com or call 980-355-2884.
