

material being used, thus providing an “extreme green”, energy-efficient home.

Sustainability features include Healthy Built Homes certification and a monthly heating and air conditioning cost guarantee from Advanced Energy. All Builders of Hope homes include large front porches, sustainable building materials, rain barrels and drought tolerant landscaping.

Offering Job Skills To Those In Need.

Builders of Hope provides the chronically unemployed, the homeless and at-risk youth the opportunity to learn job and other life skills through our work-mentor program. By partnering with faith-based organizations and other non-profits, Builders of Hope recruits potential candidates for participation in this highly successful program.

This opportunity places participants side-by-side on the job site with mentors and construction personnel. While building homes, they learn the construction process and are trained on green building techniques. They also learn the value of teamwork, perseverance, resourcefulness and

commitment. As they leave the program with a marketable skill, they also gain self-confidence and develop a strong work ethic.

There Are Many Ways You Can Help.

With the current housing crisis, the need for affordable workforce housing is more acute than ever. You can become a job-site volunteer, donate a home that would otherwise be demolished or make a tax deductible contribution to aid in furthering our mission. Please contact us to coordinate your gift.

Take the step to help Builders of Hope in rebuilding homes, revitalizing communities, and transforming lives. Your support can go a long way in changing the face of affordable housing, one family at a time.
