

Vibrant Communities – Robust Region

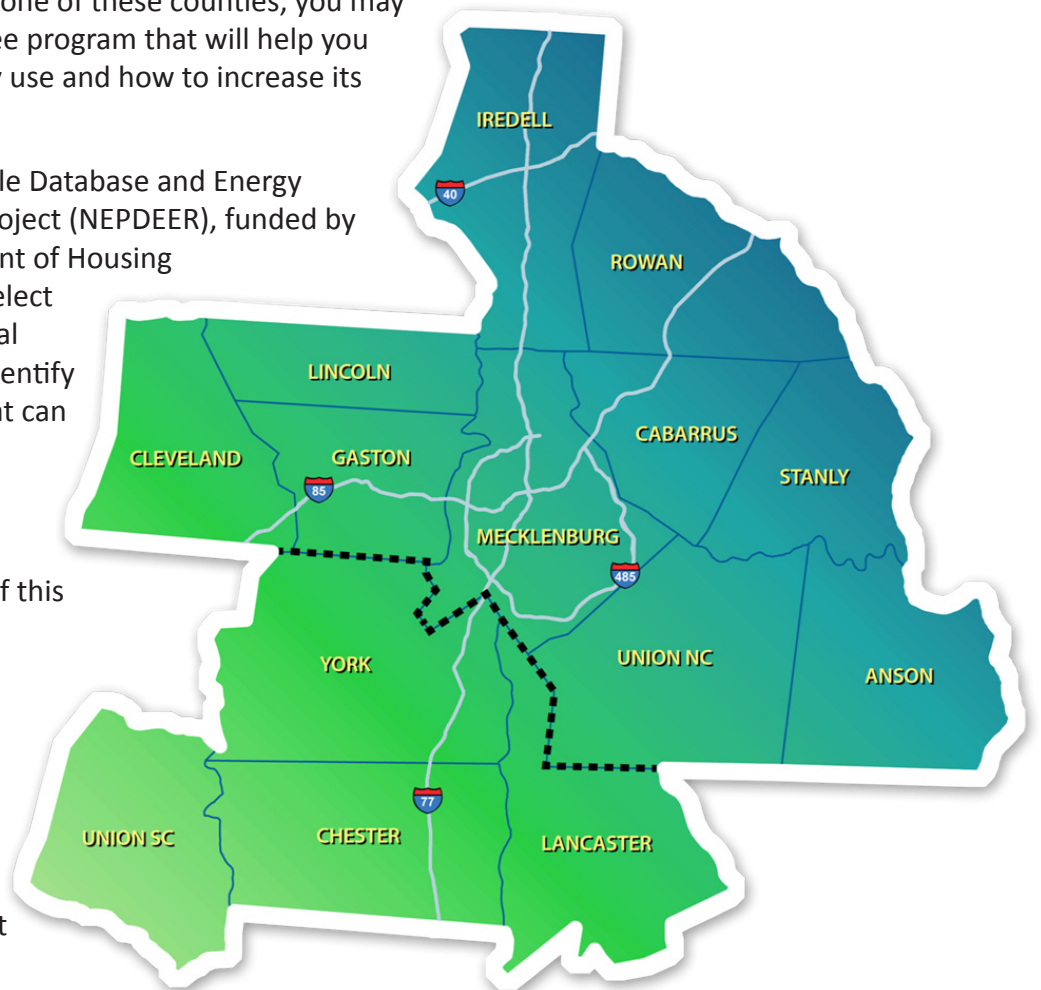

Want to save energy in your home?

If you're a homeowner living in one of these counties, you may be eligible to participate in a free program that will help you understand your home's energy use and how to increase its energy efficiency.

The Neighborhood Energy Profile Database and Energy Efficiency Recommendations Project (NEPDEER), funded by a grant from the U.S. Department of Housing and Urban Development, will select 30 homes to receive professional energy audits. The audits will identify home improvement options that can save energy and money, while increasing your comfort and improving indoor air quality.

If you'd like to take advantage of this opportunity, send an email to info@greenthinc.com with the subject line "NEPDEER" requesting the "NEPDEER Project Homeowner Application".

For additional information, review our FAQ sheet or contact Jim Kirby: (704) 618-4834 or jim.kirby@greenthinc.com.

Application deadline is Summer 2013
