I'm happy to also announce that we are introducing a 2nd program specifically for Charlotte. Girls currently in 10th or 11th grade are invited to apply for our Charlotte [Summer Immersion Program](#) sponsored by Bank of America. Community partners interested in hosting me for an information and application session with your 10th and 11th grade girls in the Charlotte area should contact me by email

nakisa.glover@girlswhocode.com. Girls Who Code is also hosting free regular [webinars](#) about the Summer Immersion program. Prospective students, parents, teachers, and partners are encouraged to join. **Hurry applications close March 16.**

- Our [Summer Immersion Programs](#) are **FREE** 7 week programs for rising junior and senior girls to learn coding and get exposure to tech jobs. Students in select markets, will learn at tech companies such as AT&T, Turner, and others. In addition, they will engage in project-based learning and build a sisterhood. Students, 2018 will be provided lunch each day and receive a stipend if they qualify. Applications for summer 2018 are *officially open* and the application closes March 16. [The link to apply is here.](#)

In addition, [here](#) is a student flyer and [here](#) is a parent flyer.

Other Girls Who Code programs

- Our [Clubs](#) are **FREE** after-school programs for 6-12th grade girls to use computer science to impact their community and join our sisterhood of supportive peers and role models. There's ZERO fee to start a Club and we provide all curriculum/lesson plan materials at no cost. We also provide a \$300 grant for folks to use on snacks, t-shirts, etc. If a teacher isn't available to host a Club, any volunteer over the age of 18 can do so (parent, after school educator, college student, etc.) We can even provide background checks at no cost. The sponsor also doesn't have to know how to code. [This an overview of our Clubs Curriculum](#) for you to reference. Both the middle and high schools can do this program. We are accepting applications through the end of February. Application can be found [here](#).
