### I helped build North Carolina's solar energy industry. I understand the urgency of our climate crisis.

Dan McCready [info@danmccready.com]

Sent: Saturday, June 08, 2019 11:44 AM

To: Steve Johnston

Steve -

Before I decided to run for Congress, I built a solar energy company right here in North Carolina. I knew that climate change was one of the biggest issues of our time, and I saw an opportunity to do something to help.

I started a company with another Marine that helped build 36 large-scale solar farms all across our state, putting 700 North Carolinians to work in good-paying jobs. Now North Carolina is second in the nation in solar power. We have more than 30,000 clean energy jobs.

It's been an amazing success story. But we can and must do more to take on the climate crisis. I know how to do it. But we need the will in Washington to get it done.

Time and time again, politicians reject the science, reject the data and sell out to the fossil fuel companies. My opponent State Senator Bishop voted against developing a state plan to comply with the Clean Power Plan. He voted to freeze North Carolina's renewable energy portfolio standard. It's up to us to demand better.

**[If you agree that climate change is a crisis and that it's time for Congress to lead, add your name to our petition today. The politicians destroying our planet need to know that the people are demanding action.](#)**

This isn't just about us. It's about our kids and our grandkids. They should not pay the price for Congress' failure to act. Thanks for adding your name on this important issue.

We can do this!

Dan
