

- **Live 360° means just that! To live a full life in 360°.**

- The goal is to build community engagement through imagination, connections and experiences. The mall provides the space, the community provides the content.

- **What does this include?**

- Culturally stimulating classes and events hosted by local individuals and organizations passionate about their area of expertise. Events can be held in a common area of the mall or in the Live 360° studio. Fitness, yoga, aerobics, demonstrations, learning opportunities, civic offerings, gardening, food, music, and much more. If the event offers something to the community with no strings attached, it's a Live 360° event!

- Creating a sense of place: Games court, Live 360° Studio with comfortable seating, reading space, entertainment, and other amenities

- Grow your skills by taking a class or offer your expertise by presenting one to connect with community members.
