Celebrate National Thrift Shop Day! Support sustainable fashion by shopping at Goodwill!

Go Green on National Thrift Shop Day

In honor of National Thrift Shop Day on August 17, Goodwill Industries of the Southern Piedmont partnered with local sustainability and fashion influencer,

[@akwearsthings](#), to highlight how secondhand shopping can help the environment. While thrifting is also a great way to find unique styles at a low cost, here are some important environmental takeaways to keep in mind the next time you're tempted to splurge on fast fashion.

Giving one item a second life reduces its CO2 footprint by 82%.

It takes *1,800 gallons of water* to grow enough cotton to make *one pair of jeans*. Buying secondhand jeans significantly reduces your environmental impact.

36 billion pieces of clothing are thrown away in the US each year. Donating your gently used items and shopping secondhand helps keep items out of the landfills.

Check out [this short video](#) to learn more about the environmental benefits of shopping secondhand.
