Wonder what it would look like for students of color to enter a school building filled with teachers and administrators that look just like them?!

Representation is key, and together, we are building this kind of future for our students and teachers.

What's the 2%? We are glad you asked. Male educators of color make up 2% of the national teaching population and leave at a rate higher than other demographics.

Will you commit to giving \$2/month to keep male educators of color in education?

As our school systems become more culturally diverse, with students of color

making up over 50% of the student population, we need our male educators of color to stay!

From seven years of working with male educators of color, we know that male educators of color need a community of support, ongoing professional coaching, access to leadership opportunities to return to the profession.

Support The 2%

And, we have [proof that it works!](#)

Join us and Support the 2% (insert link to donor page)

Just \$2/month provides 5 male educators of color with professional development opportunities.

Hear from Xavier, a Male Educator of Color, share his experience.
