Hi Steve,

I hope this email finds you well. I look forward to sharing information about youth enrichment programs, the UNC Charlotte STEM Pre-College Program and the 100 Black Men of Charlotte Movement of Youth Program, on August 16.

I am hoping that you can include the following in future announcements for the Tuesday Morning Forum...

The UNC Charlotte STEM Pre-College Program is currently accepting applications for Fall 2022 for middle and high school students with an interest in science, technology, engineering, and mathematics. The goal of the program is to broaden the pool of traditionally-minoritized students pursuing STEM majors and careers. Its objectives are met via enrichment activities on and off the campus of the University of North Carolina at Charlotte primarily through: a Saturday Academy during the academic year; a Summer Scholars program annually in June/July; a research experiences program; and in-person/virtual interactions with STEM professionals. Enrollment is currently underway until September 30, 2022. Please visit <http://tinyurl.com/charlotteprecollege> for more information and the application.

The 100 Black Men of Greater Charlotte (the 100) provides one-on-one and group mentoring for youth in the Charlotte-Mecklenburg region. With a focus on education, economic empowerment, health and wellness, and mentoring (which are the organization's four pillars), the 100 provides multiple opportunities for youth engagement in traditional and non-traditional settings. One of those settings is also at UNC Charlotte via its Movement of Youth program, or MOY. MOY takes place during Saturday mornings with multiple guest speakers from the community and 100 membership. For more information, please visit <https://100blackmenofcharlotte.org> for more information and to apply.

Sincerely,

Victor Mack
