Friend,

Access to quality healthcare should never be determined by your ZIP code.

That's why I'm proud to support [Senate Bill 369 – Medicaid Telehealth Services](#), which ensures that healthcare providers who serve patients exclusively through telemedicine can enroll as Medicaid providers—without being forced to maintain a physical presence in the state.

This bill helps us reach rural, underserved, and mobility-limited populations by eliminating outdated barriers and modernizing how we deliver care.

Telehealth isn't just a convenience, it's a lifeline. Whether it's a senior managing a chronic condition, a single parent accessing mental health care, or a child in a rural community needing a specialist, this bill is about meeting people where they are.

But passing legislation like this takes more than ideas. It takes action, advocacy, and resources.

Will you stand with me in expanding healthcare access for all North Carolinians?

DONATE

Your contribution helps us build the grassroots momentum needed to push commonsense policies forward (policies that reflect compassion, equity, and the realities of the 21st century).

Together, we can break down barriers and build a healthier, more connected North Carolina.
